

BLUE RAY PROPHECY UNFOLDING IN JULY 2026

SUBJECT TO REVISION AND/OR EXPANSION

1. Initially it is foreseen that THREE Celestial Nature Goddesses will be brought into this space-time continuum by a future ascended Master Avadar. Other future ascended masters may also pursue this. There is also a possibility that a future ascended lesser god or a future ascended Creator God will bring in one or more Celestial Nature Goddesses before Avadar's ascension.
2. The Celestial Nature Goddesses will Light-manifest Temples of Light that will supersede all churches, temples, and mosques with far greater miracles than demonstrated in any traditional religion. The foundation of spiritual thought, Avadaric Mysticism, is the closest approximation to the metaphysical foundation that the Celestial Goddesses will espouse. Celestial Goddesses will not be pacifistic and will violently defend their temples and heart chakra radiant pilgrims against all enemies in the discarnate dimensions, and also on the physical plane.
3. A future ascended Master Avadar will initially Light-manifest at least TWELVE Virtue Power Goddess Guardians. Possibly more later. They are not to be artificial intelligence (AI) but highly evolved soul consciousness. Each to be high-end lesser goddesses or Para-Magi (at the level of PM-8) and with a high level of sensual development. Along with the Celestial Nature Goddesses, they will conquer The Reticulan Empire locally, ending all alien abductions for the harvesting and subjugation of humans. When the space empire sends a retaliatory interstellar fleet of warships from the Zeta 2 Reticuli System, they will be met in deep space by the Celestials who will be much more powerful than the Powers.
4. The Celestial Nature Goddesses will restore the ancient trees on Terra that currently look like immense tree stubs and are officially interpreted locally as mountains.
5. In the First Wave of new spiritual masters, Master Arcon is the most consistent Radiant Sex Goddess and also the most consistent Heart Chakra Radiance (HCR) Adept outside of Master Avadar.
6. Many lesser goddesses and lesser gods will be invited to live in the probable, tropical, and lush archipelago (the UTOPIC AUREAN REALM) that is Light-manifested, energy shielded, and carefully environmentally controlled (no violent storms) by a future ascended Master Avadar.

7. Ascended group entities (AGEs) of unstable and imperialistic lesser gods and lesser goddesses will prove to be more of a problem for higher planetary society governmental stability than The Reticulan Empire will be in the long run.

8. Temples of Light will be highly automated. Radiant devotees will enter and see clearly marked Circles of Healing on the marble floor. When they put themselves in a Circle and perform Gratitude Radiance, a powerful channel of transcendent energy healing will be activated.

9. Master Avadar will orchestrate the first God Realized sexual culture that is based in cultivating spiritual purity, rejecting lusty energy from inferior spirits, and radiating purified erotic love before pursuing sexual intercourse in bodies that are specially for statuesque beauty, sexual pleasure, unique sexual hygiene (e.g., no reproductive capability yet fully sexually capable and with no body odor) and unique, athletic, martial arts ability.

10. Radiant devotees who have a well-developed sensuality (erotic love) index, as part of their overall Heart Chakra Radiance, will have their bodies transformed via Circles of Light into youthful and beautiful bodies that have no reproductive capability yet be fully sexually functional. If they desire it, they will be given the opportunity for safe passage to upscale residences in the probable, tropical, Aurean archipelago, and given a part-time job to easily maintain their rent and meals. They will be expected to continue to use Heart Chakra Radiance and Sacral Chakra Radiance every single day and be allocated time for that. This will be available to individuals, not couples or families; however, if more than one individual from a family is given the opportunity for safe passage, the affiliation is not discouraged, and they will be able to communicate with one another and even live near one another in the Aurean archipelago.

11. There are considerable differences between the unfolding spiritual masters or HCR Adepts. Avadar is the most advanced, the most refined in his energy projections of love, and the most sexually cautious – even with those who have successful Radiant Interplay with him. Avadar's focus for a Goddess close to him or an allied Goddess greeting him, is to gently kiss her "hello" on the lips while radiating intense sensual love energy that triggers in her a systemic orgasm (i.e., an O-Kiss) - and then leave it at that. The Celestial Nature Goddesses will be sexually aggressive and adventurous.

12. The spirit of a minor Catholic pope, Seth, through the trance medium Jane Roberts, predicted in 1970 that a "new system of spiritual thought," orchestrated by the soul of Paul of Tarsus who became dissatisfied with how Christianity turned out, would ultimately replace it (with no worship of Jesus or anyone else), and that it would be finalized by the year 2075. That probability has changed. It is now predicted to be finalized by 2035.

13. Spiritually based technology in the form of transcendent energy generators (or spiritual power generators) on the eighth astral plane and beyond, will become the predominant method of producing electricity (as well as energy healing) before the end of the Twenty-Second Century. These will replace nuclear reactor power, antimatter reactor power, and zero-point energy systems for electricity.

14. We foresee a three front military engagement with The Reticulan Empire. All happening simultaneously. To consist of the battle on, around, and inside Terra with various alien cities to stop alien abduction abuse and free millions of slaves and victims of laboratory experiments; the battle in deep space with the vast Zetan fleet of interstellar warships; and the battle to defend the future Utopic Aurean Realm from the environmental damage of long-range antimatter missiles.
